# Providing a comprehensive range for patient cleansing.

Significantly more  
absorbent

Soft gentle  
& strong

Improved user  
experience

Reduced  
costs

## The Problem

Cost pressures are continually eroding product quality, with many people choosing to buy cheaper, smaller, thinner wipes. This trend is completely unsustainable, and we find that often those who use a lower quality wipe actually spend more than those who choose a superior more highly absorbent product, simply by the fact that they use more.

A perception has been created that 'all wipes are the same', whereas in reality this couldn't be further from the truth. There is a clear requirement for educating the end-user about what is best for their individual needs, and we will continue to offer the best possible products to deliver the best possible care.

**COST PRESSURES CONTINUE  
TO ERODE PRODUCT QUALITY.**
